- Scala Machine learning
- SQL

PROFILE

I am an aspiring Data analyst with a strong foundation in machine learning and statistical analysis concepts. I am proficient in various programming languages with a knack for web and app development. Seeking opportunities to apply my skills and contribute to data-driven decision-making processes in a dynamic professional setting.

EXPERIENCE

NDIS CONSULTANCY INTERNSHIP

MAGNA NDIS

Feb 2023 - Jun 2023

- Worked in a data science project as an intern in a National Disability Insurance Scheme (NDIS) consulting firm.
- Utilized various data analysis tools to collect, clean, and analyze data related to NDIS companies in NSW.
- Collaborated with a team of professionals to develop insights and actionable recommendations based on the data analysis.
- Presented the findings and recommendations to the project team and company executives.

SKILLS

- Data Analysis & Visualization: Proficient in data manipulation, cleaning, and visualization using tools like Python, R, and various data analysis libraries.
- Machine Learning: Strong understanding of machine learning algorithms, model development, and evaluation metrics.
- Web & App Development: Competent in web development (React native, React web)
- DBMS: Skilled at using SQL and NOSQL languages like MongoDB
